

# **APOLLO REACH HOSPITALS, KARIMNAGAR RECTIFIED**

**FROM : MY STORY -KHAJA NAIMUDDIN (Patient)**

**GOOD MORNING TO ALL.**

I am 73-year-old man leading on as leisurely retired life and thought that my life would gone comfortably. I suffer from hypertension and I am taking medicine and that did not determine my activities. But the pain in my right knee, initially it was on and off, subsided with rest and medication, for last few months its gradually worsening. This I thought was across that I should fear, what do you follow the Miracle of the Modern Medicine.

They said that my osteoarthritis of knee can be dealt with by total knee replacement. I was very apprehensive at first. I spoke to a couple of people who had that operation and have seen them walking almost normally and carrying out normal activities with ease. I was emboldened by this and had decided to Consultant Orthopaedic Surgeon Dr. Venkat Reddy.

The doctor examined me very thoroughly and said right knee can be operated on and good to excellent result to early follow. After much praying and worshipping god. I was admitted in Apollo Reach Hospital. I was thoroughly investigated and as contained my fitness for surgery.

My right knee surgery done on 28/07/2022 right total knee replacement was performed. By the grace of God, the operation went very well. After 2 days when the physiotherapy was started. That caused severe pain, apart from that there was no problem and I started walking gingerly at first, now improved. I am most grateful to my God. I am very thankful to Dr. Venkat Reddy sir and his team, Anaesthesia Doctors, Nurses and all support staff, who have been very kind and helpful.
